Rezumat

Pancreasul heterotopic este o anomalie congenitală rară. Cele mai comune locații sunt stomacul, duodenul, jejunul și mult mai rar ampula Vater, esofagul, ileonul, diverticulul Meckel, tractul biliar, mezenterul și splina. Prezentăm cazul unei paciente de 49 ani cu icter mecanic prin pancreas ectopic la nivelul ampulei Vater, inițial interpretată ca tumoră malignă. S-a practicat duodeno-pancreatectomie cefalică tip Whipple cu evoluție favorabilă, concentrația serică a bilirubinei normalizându-se după prima săptămână postoperator.

Cuvinte cheie: pancreas heterotopic, icter mecanic, ampula lui Vater
